

R 1-11-3 Policy Manual Distribution

The policies that have been approved by the Board have been codified and compiled in this manual. Central office and building level administrative regulations must be consistent with these officially adopted policies. This policy manual is not now complete, nor will it ever be. As new policies are adopted and old policies changed, updates will be sent to the custodians of the manual and electronic copies of the manual will be updated.

A minimal number of manuals shall be placed strategically throughout the District. Placement shall include: one copy at each of the following sites - central administrative offices, principals' offices, and a summary of selected policies will be placed on the Board's web site.

Board members and employees cannot be urged too strongly to study carefully the Policy Manual and administrative bulletins directed to them. These policies represent the guidelines, parameters, and constraints within which the school district operates.
